1 Introduction

Just throwing together some concepts and examples for later reference

2 git

2.1 Setting Your Identity

```
$ git config --global user.name "name"  
$ git config --global user.email email@domain.com
```

2.2 Creating a Repository

Go to folder in terminal/prompt, and type:
\$ git init

2.3 Cloning a Repository

Go to folder in terminal/prompt, and type:
\$ git clone https://github.com/repo/folder directory

2.4 Submit Changes in Director

```
$ git commit
```
